Continuing Education in Dental Schools

1983/84

SUPPLEMENT 6
TO THE
ANNUAL REPORT 1983/84
DENTAL EDUCATION

The information on Continuing Education offered in the United States Dental Schools contained in this report was gathered from the 1983 Survey of Predoctoral Dental Educational Institutions. The annual survey is conducted by the American Dental Association as part of the accreditation process for dental schools. All United States dental schools participate in the survey. Included in this report is information on courses offered, enrollment, faculty and administration of continuing education in dental schools; types of courses offered, namely basic science, clinical science, and dental auxiliary; facilities available for continuing education in dental schools, in dental clinics or hospitals, and elsewhere.

Table 1 reports general information regarding continuing education in dental schools during the 1982-83 academic year. Column 2 reports the number of courses offered at each school. An average of 41.9 courses at each school. The range, however, spread between 6 at University of Connecticut and Loyola University to 146 at the University of California, San Francisco. Column 3 indicates the percent of courses that included clinical participation. The range of courses at each dental school which included clinical participation spread between 0 and 85 percent (University of Texas, San Antonio). Only 1 school offers a course with no clinical participation*. Column 4 indicates the total enrollment in courses at each dental school. The average total enrollment in courses offered at each

* Southern Illinois University has a continuing education program, however the program was not active this year.

dental school was 1553.1. The average total number of days of instruction for the courses in the basic sciences (Table 2) and clinical science (Table 3) was 24.7 and 43.1, respectively. Table 4 indicates that on the average 6.7 courses for dental auxiliaries were offered at each dental school with a mean participation of 26.4. There were 12 schools that offered no courses for dental auxiliaries. The average total number of days of instruction at each school for the courses of dental auxiliaries was 14.1

Table 5 reports the faciliaties available in the dental school for continuing education programs. Column 2 indicates the percent of courses that include clinical participation. There was 1* school that offered no course with clinical participation. The range of courses offered with clinical participation spread from 7% to 85%. Columns 3 to 10 indicate the types of facilities available at each dental school for continuing education. There was 51 dental schools that had patient and case records available, 57 dental schools that had laboratory available, 60 schools that had operatories available, 58 dental schools that had the dental library available, 60 schools that had conference rooms available, 60 schools that had classrooms available, and 59 schools had audiovisual aids available for continuing education courses.

* Southern Illinois University has a continuing education program, however the program was not active this year.

Table 6 and 7 reports the facilities available in outside clinics or hospitals and at other locations where dental schools offer continuing education courses. As one would expect availability of facilities for clinical participation drop off as one leaves the dental school. An examination of the tables indicate this shift of availability of facilities.
